CASTORIA

for Infants and Children.

The Effects of Opiates.

THAT INFANTS are peculiarly susceptible to opium and its various preparations, all of which are narcotic, is well known. Even in the smallest doses, if continued, these opiates cause changes in the functions and growth of the cells, which are likely to become permanent, causing imbecility, mental perversion, a craving for alcohol or narcotics in later life. Nervous diseases, such as intractable nervous dyspepsia and lack of staying powers, are a result of dosing with opiates or narcotics to keep children quiet in their infancy. The rule amon physicians is that children should never receive opiates in the smallest doses to more than a day at a time, and only then if unavoidable.

The administration of Anodynes, Drops, Cordials, Soothing Syrups and othnarcotics to children by any but a physician cannot be too strongly decried, . the druggist should not be a party to it. Children who are ill need the after of a physician, and it is nothing less than a crime to dose them willfully with a cotics. Castoria contains no narcotics if it bears the signature of Chas. H. Fietche
